Dear Dr. Laperriere,

I have recently completed a comprehensive security planning program with Bob Zinner that involved a full analysis of my current financial situation with projections done to retirement. This was done solely as a result of the PMH/OCI medical staff association introducing and recommending the service to its members. I want to let you know how pleased I am that you and your executive have made such a service available here at PMH. In all the years I spend in training and research in Britain, no such service, completely oriented to advising and educating doctors on the essentials of sound ongoing planning, was ever offered.

The program has been extremely helpful to me and I would not hesitate to recommend it to any doctor. Please feel free to refer any doctors to me who might wish to know more about this service from another doctor.

Sincerely and respectfully,

Dr. Katherine Vallis  
Department of Radiation Oncology PMH
